1. Tested product

We tested the new **IKARUS virus.utilities T3** from the Austrian-based IKARUS Security Software GmbH vendor, with last signature update and version of the 30th September 2007 (Version 1.0.60, Build 69596) and with highest settings under Windows XP SP2. The used test-set is from the 5th August 2007 and contains over 800.000 malware samples.

2. Test results

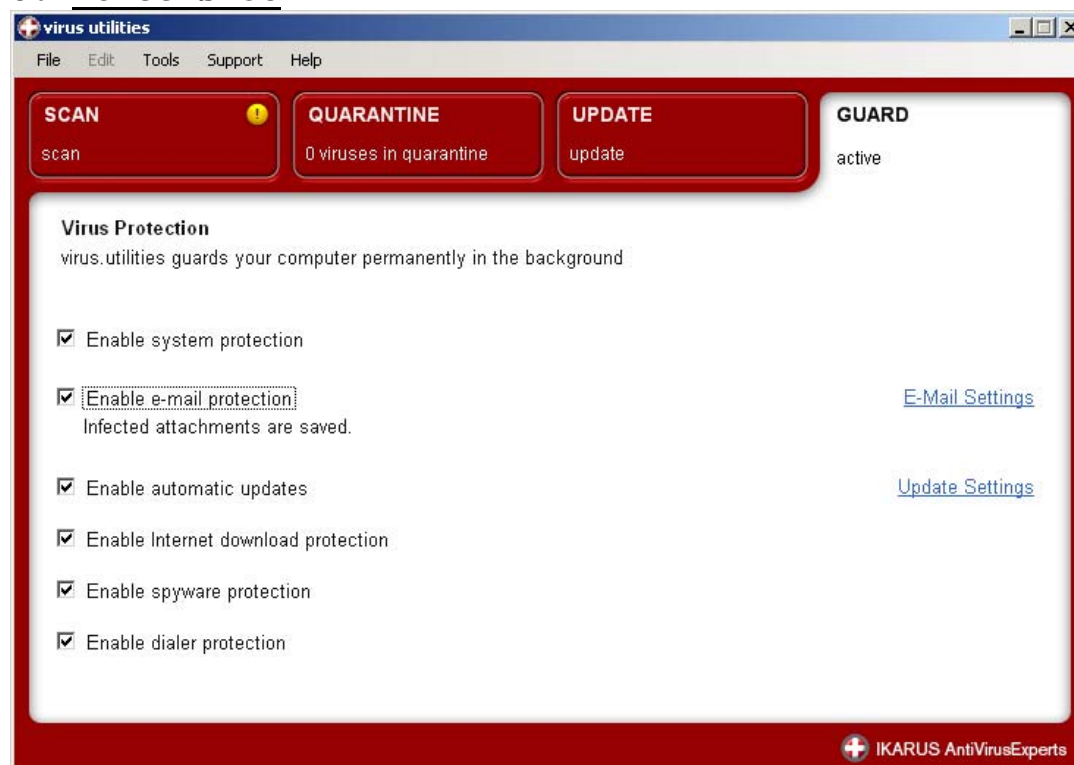

Below the on-demand detection rates of IKARUS virus.utilities T3:

| | |
|-------------------------|-----|
| Windows viruses | 98% |
| Macro viruses | 99% |
| Script viruses/malware | 88% |
| Worms | 96% |
| Backdoors | 98% |
| Trojans | 97% |
| Other malware | 85% |
| OtherOS viruses/malware | 97% |

TOTAL detection rate: 97%

Considering that the product was tested over a nearly 2 month old test-set, with a total detection rate of 97%, IKARUS virus.utilities T3 would in our regular tests probably reach the ADVANCED certification level.

4. Comments

IKARUS (www.ikarus.at) virus.utilities T3 v1.0.60 is a major improvement (regarding the detection rate, the speed and the stability) compared to its previous versions.

IKARUS virus.utilities T3 is not certified by WestCoastLabs and/or ICSALabs and has recently not passed the VirusBulletin tests (mainly due the relatively high amount of false alarms).
