Test commissioned by the vendor of the product.

Tested product

The product for this internal test has been submitted by Faronics:

Faronics Anti-Virus | Version 3.42.2102.251

Time of Testing: August 2014 (1 month continuous testing)

Real-World Protection Test

The results are based on the test set of **669** live test cases (malicious URLs found in the field), consisting of working exploits (i.e. drive-by downloads), URLs pointing directly to malware, and a few malicious files from email attachments. The latter are downloaded and executed via webmail. Thus exactly the same infection vectors are used as a typical user would experience in everyday life. The test-cases used cover a wide range of current malicious sites and provide insights into the protection given by the product (using **all** its protection features) while surfing the web.

For more information about this Real-World Protection Test, please read the details and previous test reports available on <http://www.av-comparatives.org>

Test Results

| | |
|--------------------------------|----------------|
| Total detection rate | 91,0% |
| Number of false alarms: | 4 (few) |

Certification valid till September 2015
