Details of false alarms

In AV testing, it is important to measure not only detection capabilities but also reliability. One aspect of reliability is the ability to recognize clean files as such, and not to produce false alarms (false positives). No product is immune from false positives (FPs), but some produce more than others. False Positives Tests measure which programs do best in this respect. There is no complete collection of all legitimate files that exist, and so no "ultimate" test of FPs can be done. What can be done, and is reasonable, is to create and use a set of clean files which is independently collected. If, when using such a set, one product has e.g. 30 FPs and another only 5, it is likely that the first product is more prone to FPs than the other. It doesn't mean the product with 5 FPs doesn't have more than 5 FPs globally, but it is the relative number that is important.

All listed false alarms were encountered at the time of testing. False alarms caused by unencrypted data blocks in anti-virus related files were not counted. If a product had several false alarms belonging to the same application, it is counted here as only one false alarm. Cracks, keygens, or other highly questionable tools, including FPs distributed/shared primarily by vendors (which may be in the several thousands) or other non-independent sources are not counted here as false positives.

In order to give more information to the user about the false alarms, we try to rate the prevalence of the false alarms. Files which were digitally signed are considered more important. Due to that, a file with the lowest prevalence level (Level 1) and a valid digital signature is upgraded to the next level (e.g. prevalence “level 2”). Files which according to several telemetry sources had zero prevalence have been provided to the vendors in order to fix them, but have also been removed from the set and were not counted as false alarms.

The prevalence is given in five categories and labeled with the following colors: 

Level		Presumed number of affected users	Comments
1		Probably fewer than a hundred users	Individual cases, old or rarely used files, unknown prevalence
2		Probably several hundreds of users	Initial distribution of such files was probably much higher, but current usage on actual systems is lower (despite its presence), that is why also well-known software may now affect / have only a prevalence of some hundreds or thousands of users.
3		Probably several thousands of users	
4		Probably several tens of thousands (or more) of users	
5		Probably several hundreds of thousands or millions of users	Such cases are likely to be seen much less frequently in a false alarm test done at a specific time, as such files are usually either whitelisted or would be noticed and fixed very fast.

Most false alarms will probably fall into the first two levels most of the time. In our opinion, anti-virus products should not have false alarms on any sort of clean files regardless of how many users are currently affected by them. While some AV vendors may play down the risk of false alarms and play up the risk of malware, we are not going to rate products based on what the supposed prevalence of false alarms is. We already allow a certain number of false alarms (currently 10) inside our clean set before we start penalizing scores, and in our opinion products which produce a higher number of false alarms are also more likely to produce false alarms with more prevalent files (or in other sets of clean files). The prevalence data we give for clean files is just for informational purpose. The listed prevalence can differ inside the report, depending on which file/version the false alarm occurred, and/or how many files of the same kind were affected.

There may be a variation in the number of false positives produced by two different programs that use the same engine (principal detection component). For example, Vendor A may license its detection engine to Vendor B, but Vendor A's product may have more or fewer false positives than Vendor B's product. This can be due to factors such as different internal settings being implemented, differences in other components and services such as additional or differing secondary engines/signatures/whitelist databases/cloud services/quality assurance, and possible time delay between the release of the original signatures and the availability of the signatures for third-party products.

False Positives (FPs) are an important measurement for AV quality. One FP report from a customer can result in large amount of engineering and support work to resolve the issue. Sometimes this can even lead to important data loss or system unavailability. Even "not significant" FPs (or FPs on older applications) deserve mention and attention because FPs are likely to be a result of principled rule detections. It just happened that the FP was on an insignificant file. The FP possibility is probably still in the product and could cause an FP again on a more significant file. Thus, they still deserve mention and still deserve to be penalised. Below you will find the false alarms we observed in our independent set of clean files. Red entries highlight false alarms on files that were digitally signed.

ESET had zero false alarms on the used set of clean files.

McAfee

False alarm found in some parts of	Detected as	Supposed prevalence
ConMana package	Artemis!15BECDDD6D7B	
TalkSender package	GenericRXAV-IV!87E29BAC562F	

McAfee had 2 false alarms.

eScan

False alarm found in some parts of	Detected as	Supposed prevalence
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1 (DB)	
HurtWorld package	Gen:Variant.MSILPerseus.117628 (DB)	
SucheTotal package	Gen:Variant.Razy.218986 (DB)	

eScan had 3 false alarms.

Adaware

False alarm found in some parts of	Detected as	Supposed prevalence
Apfelmann package	Trojan.Generic.20825558	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HurtWorld package	Gen:Variant.MSILPerseus.117628	
SucheTotal package	Gen:Variant.Razy.218986	

Adaware had 4 false alarms.

Bitdefender

False alarm found in some parts of	Detected as	Supposed prevalence
AirFlow package	Zum.Androm.1	
Apfelmann package	Trojan.Generic.20825558	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HurtWorld package	Gen:Variant.MSILPerseus.117628	
SucheTotal package	Gen:Variant.Razy.218986	

Bitdefender had 5 false alarms.

BullGuard

False alarm found in some parts of	Detected as	Supposed prevalence
AirFlow package	Zum.Androm.1	
Apfelmann package	Trojan.Generic.20825558	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HurtWorld package	Gen:Variant.MSILPerseus.117628	
SucheTotal package	Gen:Variant.Razy.218986	

BullGuard had 5 false alarms.

VIPRE

False alarm found in some parts of	Detected as	Supposed prevalence
AirFlow package	Zum.Androm.1	
Apfelmann package	Trojan.Generic.20825558	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HurtWorld package	Gen:Variant.MSILPerseus.117628	
SucheTotal package	Gen:Variant.Razy.218986	

VIPRE had 5 false alarms.

Emsisoft

False alarm found in some parts of	Detected as	Supposed prevalence
AirFlow package	Zum.Androm.1	
Apfelmann package	Trojan.Generic.20825558	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HurtWorld package	Gen:Variant.MSILPerseus.117628	
OrangeGem package	Trojan.Sinowal.Gen.1	
SucheTotal package	Gen:Variant.Razy.218986	

Emsisoft had 6 false alarms.

Microsoft

False alarm found in some parts of	Detected as	Supposed prevalence
AnimationSuite package	Exploit:HTML/CodeBaseExec	
Cypics package	Trojan:Win32/Fuery.B!cl	
eRightSoft package	Trojan:Win32/Dynamer!ac	

HackerSecurity package	Trojan:Win32/Fuery.B!cl	
Silverke package	Trojan:Win32/Fuery.B!cl	
TouchAble package	Trojan:Win32/Fuery.A!cl	

Microsoft had 6 false alarms.

Seqrite

False alarm found in some parts of	Detected as	Supposed prevalence
Apfelmann package	EE:Malware.Generic.20825558	
Cubes package	Trojan.IGENERIC	
FurnPlan package	EE:Heur.MSIL.Bladabindi.1	
HurtWorld package	EE:Malwr.Heur.MSILPerseus.117628	
Imation package	TrojanPWS.Crypt	
MyPCBackup package	Trojan.IGENERIC	
SIW package	Trojan.IGENERIC	
SucheTotal package	EE:Malwr.Heur.Razy.218986	

Seqrite had 8 false alarms.

Avast

False alarm found in some parts of	Detected as	Supposed prevalence
AcpCtrl package	Win32:Malware-gen	
AtomConverter package	Win32:Evo-gen	
AutoPlay package	Win32:Evo-gen	
CS package	Win32:Evo-gen	
DNSQuery package	FileRepMalware	
Prey package	FileRepMalware	
SurfBlocker package	Win32:Evo-gen	
TwinkiePaste package	Win32:Dh-A	
ZHPCleaner package	FileRepMalware	

Avast had 9 false alarms.

AVG

False alarm found in some parts of	Detected as	Supposed prevalence
AcpCtrl package	Win32:Malware-gen	
AtomConverter package	Win32:Evo-gen	
AutoPlay package	Win32:Evo-gen	
CS package	Win32:Evo-gen	
DNSQuery package	FileRepMalware	
Prey package	FileRepMalware	
SurfBlocker package	Win32:Evo-gen	
TwinkiePaste package	Win32:Dh-A	
ZHPCleaner package	FileRepMalware	

AVG had 9 false alarms.

Kaspersky Lab

False alarm found in some parts of	Detected as	Supposed prevalence
Acrobat package	DangerousObject.Multi.Generic	
Deskline package	Trojan.Win32.TDSS.rfeb	
DreiKampf package	DangerousObject.Multi.Generic	
eBayWatcher package	DangerousObject.Multi.Generic	
Elba package	DangerousObject.Multi.Generic	
Ferrari package	DangerousObject.Multi.Generic	
Norman package	Trojan-Spy.MSIL.KeyLogger.sb	
Saver package	Trojan.Win32.Scar.pshu	
SpyBlocker package	Trojan-Dropper.Win32.Dinwod.gen	
TransXP package	DangerousObject.Multi.Generic	

Kaspersky Lab had 10 false alarms.

AVIRA

False alarm found in some parts of	Detected as	Supposed prevalence
ActivePresenter package	HEUR/APC	
Anno package	HEUR/APC	
DeadBolt package	HEUR/APC	
DebutVideo package	HEUR/APC	
HurtWorld package	HEUR/APC	
Inside package	HEUR/APC	
QB package	HEUR/APC	
ThuBattery package	HEUR/APC	
VisualStudio package	HEUR/APC	
WGet package	HEUR/APC	
YouDown package	TR/Crypt.XPACK.Gen7	
Zimmermann package	TR/Crypt.XPACK.Gen	

AVIRA had 12 false alarms.

Crowdstrike

False alarm found in some parts of	Detected as	Supposed prevalence
Adressen package	High Severity Activity Prevented	
Civilization package	High Severity Activity Prevented	
Comeleo package	Medium Severity Activity Prevented	
Doris package	Medium Severity Activity Prevented	
FineReader package	High Severity Activity Prevented	
FotoFit package	Low Severity Activity Prevented	
GT4T package	Medium Severity Activity Prevented	
HP package	Medium Severity Activity Prevented	
MusicMaker package	Low Severity Activity Prevented	
Passwort package	Medium Severity Activity Prevented	
Siedler package	Medium Severity Activity Prevented	
Tennis package	High Severity Activity Prevented	

Tierpension package	Low Severity Activity Prevented	
VisualStudio package	Low Severity Activity Prevented	
WX package	Medium Severity Activity Prevented	
ZipPack package	Medium Severity Activity Prevented	

Crowdstrike had 16 false alarms.

Tencent

False alarm found in some parts of	Detected as	Supposed prevalence
Acer package	Malicious file	
Apfelmann package	Trojan.Generic.20825558	
Cleaner package	Malicious file	
Deskline package	Malicious file	
eBayWatcher package	Malicious file	
FurnPlan package	Gen:Heur.MSIL.Bladabindi.1	
HotCorners package	Malicious file	
HurtWorld package	Malicious file	
IE package	Malicious file	Iron package	Malicious file	Kloetzchen package	Malicious file	
Menue package	Malicious file	
ORF package	Malicious file	
Rapid package	Malicious file	
Repair package	Malicious file	
SpyBlocker package	Malicious file	
SucheTotal package	Gen:Variant.Razy.218986	
Tierpension package	Malicious file	
VisualStudio package	Malicious file	
WormCleaner package	Malicious file	

Tencent had 20 false alarms.

F-Secure

False alarm found in some parts of	Detected as	Supposed prevalence
Apfelmann package	Trojan.Generic.20825558	
Avid package	Trojan:W32/Generic.472343a2a9!Online	
Billeo package	Trojan-dropper:W32/Coinminer.05e461fc33!Online
